JUNE 1934

THE PRESIDENT'S MESSAGE

o o o

THESE hot summer days make me wonder if enough of us realize how important the ice man is to the fortunes of Gulf States and to what extent his success affects the success of all of us. The Company has fifteen ice plants scattered around through its territory, those at Port Arthur and Lake Charles being particularly important because of the large markets they serve.

EACH week ice employees spend hours of their own time studying their business and planning means by which they can increase their output. Their sales contests are as spirited and enthusiastic as those of the electric sales department. Certainly these fellows deserve a great deal of encouragement and commendation for the fine job they are doing against odds. We take considerable pride in our record for electrical refrigerator sales, and gleefully count the number added each year by ourselves and other dealers. I am here now to say a good word for the ice man, who also takes pride in these accomplishments but at the same time goes ahead day by day doing his utmost to make his department a success.

DURING these trying days when mounting taxes and greatly increased costs of operation are retarding the Company's progress to the disadvantage of every employee, it is not a bad idea to recognize the contribution that each department and each employee is making to the fight that the Company is waging to speed the day when we shall come out on top. So let's pay our tribute now to the ice man and wish him well as he sweats away during these hot summer months, making this necessary service acceptable to our customers.

IS THIS ELECTRIC RANGE WEATHER?

Ask the employee (or anyone else) who owns one!

Now is the ideal time to sell your friends and neighbors on the advantages, particularly the coolness, of electric cookery. With the thermometer sticking around 103 degrees, preparing "three squares a day" in a hot kitchen ceases to be fun.

To be a good booster of electric cookery you should, of course, own an electric range. Buy one now and enjoy it this summer...you'll be doing yourself, as well as the Company, a big favor.

Hull-Daisetta

Under the Company's range replacement plan recently adopted, we have proven the desirability of electric cookery by replacing an 8-year old Crawford, an 8-year old Hotpoint, and a 15-year old Edison range with new Waldorf Electrochefs.

We have been getting our share of the refrigeration business this year. From March 1st to June 15, seventeen G-Es have found their way into Hull-Daisetta homes.

Supt. Rhea Hudnall was elected vice-president of Hull-Daisetta school board at regular meeting June 5.

Cashier Mamie Hull left June 14 for what we hope will prove to be a 2-weeks vacation. Much speculation centers about her mysterious maneuvers at this time.

P.N. Masterson, Beaumont, is with us while Mamie "vacates."

Crops in our territory are in good condition at this time with many acres of good truck

farm land being cultivated that have lain fallow for the last few years.

Fillingame has returned from Louisiana with a fresh stock of fish stories. As proof of his skill, however, he is showing a collection of fish heads which he has mounted.

L.K.Bankston, A.McMillian, E. Rauschenberg, R.D.McMillian, G.H. Hawkins, G.P.Fillingame, S.W. Wilkes, T.M.McNeil, L.Homuth, and Roy Robinson have received certificates for having completed a Red Cross First Aid course. Illness prevented R.W.Matulik's finishing the course, but he ably demonstrated benefits of his training when his young daughter severed a blood vessel in her hand.

We wonder how Pop Jordan happened to have the address of a girl named Ruby in his zipper coat when it was returned from the repair shop!

E.L.Hegwood was a source of amusement to the Telephone Co. boys when he attempted to climb a pole without hooks.

"I hear you have been spreading reports that I am old enough to be your mother."

"How ridiculous. I merely remarked that I was young enough to be your daughter."

"My wife is very irritable; the least thing sets her off."

"You're lucky at that, mine's a self-starter."

The aviation instructor, having delivered a lecture on parachute work, concluded:

"And if it doesn't open... well, gentlemen, that's what is know as 'jumping to a conclusion.'"
